

Ultrex Plus PBB
Sustainable Water Treatment Program for Cooling Systems

Ultrax Plus PBB

Sustainable Water Treatment Program for Cooling Systems

Concentrated Powder in a Bag in a Box (PBB) is designed for outstanding corrosion and scale control and when used in conjunction with a bio-control program provides a clean heat transfer system.

Why Choose Ultrax Plus PBB?

- DRUM-FREE eliminates heavy drum handling and disposal
- Reduces freight costs
- Minimizes inventory costs
- Improves worker safety
- Minimizes exposure to liquid chemicals
- Reduces your carbon and water footprint (calculator available to show real environmental impact in *your* facility)

Reduces Total Cost of Operation

- Reduces maintenance and cleaning requirements
- Minimizes shutdowns and downtime
- Extends equipment life (cooling towers, compressors, heat exchangers)
- Minimizes energy
- Lowers water usage

Additional Benefits

- Proprietary chemistry
 - Keeps heat transfer surfaces clean and free of organic deposits
 - Delivers outstanding corrosion inhibition
 - Prevents "seed" crystals from developing into scale
 - Suspends oils and bio-growth to easily discharge or blow down
 - No side feed detergent additives needed
 - Outstanding performance for deposition control for high heat transfer systems
- Designed to perform in the majority of water conditions in North America in applications from heavy industrial to comfort cooling
 - LSI (Langelier's Saturation Index) of up to 3.3 (typical LSI is 2.5)
 - Treats systems with elevated waterside temperatures
- Effective at low dosage
- DuBois proprietary "Tracer X" product control
- **A cleaner system means lower water and energy consumption!**

Contact DuBois today so we can begin a sustainable partnership with you!

Reorder # 1383055 (42909) • Ultrax Plus PBB

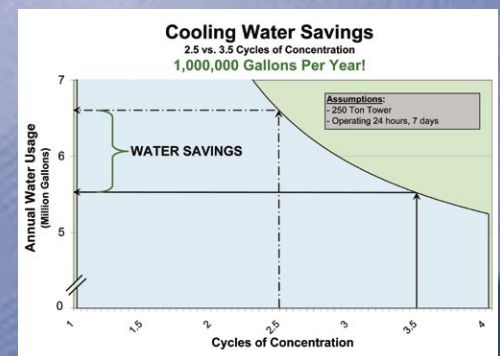

PBB Is Easy To Use

Ultrax Plus PBB is packaged in a small bag for economic shipping. Just empty the pouch into the compact makeupdown system. Recycle the cardboard box.

Ultrax Plus PBB provides a much lower deposition rate over a wider heat flux range compared to industry standards.

Increased LSI allows you to operate your cooling tower at higher cycles of concentration, which saves water, and the chemistry used to treat the makeup water.
